

Strategy description

The FCT 1e 40 Index strategy is a purely passive investment strategy made available to FCT 1e company affiliates and insured members.

The investment strategy aims to replicate the Pictet LPP 2000 40 index consisting of equities (40%) and bonds. The strategy is entirely invested in low-cost, passive funds managed by Credit Suisse and UBS Asset Management. The strategy is rebalanced monthly back to target weights.

The strategy is appropriate for investors with an average capacity / willingness to take risks and an investment horizon of 5 or more years.

Legend: Performance is computed on a monthly basis as the median performance of all the FCT 1e insured members invested in the investment strategy (if no insured member is invested, performance is backtested). In both cases, performance is computed as a time weighted rate of return (TWR) on the investment portfolio, excluding operational cash. Performance is shown net of indirect fees (charged inside the funds) and gross of direct fees (charged outside the funds). Foreign currency exposure is after currency risk hedging. Proportion of ESG investments correspond to ESG-labelled funds as considered by the asset manager.
